	Minimal	0	0%	0%						

-  Distance Learning for all students due to substantial Covid-related risk
-  Choice between learning modalities based on the metrics levels; social distancing maintained in classrooms
-  Specialized populations increase in-person learning days by invitation only; social distancing **MUST** be able to be maintained in classrooms
-  Learning modality choice would include social distancing to the best extent possible in classrooms

- ☐ *Transitions between learning modalities are intended to be a phased in approach allowing teachers and students adequate time to adapt to the demands of the given learning modality while allowing for a level of consistency in learning*
- ☐ *BUHSD's ability to provide any in person learning modality is dependent upon having adequate staff to run our schools safely*
