A Message from the Superintendent

Dr. Steven Bebee

BUHSD Parents and Guardians

One of the priorities and goals I have had for the Buckeye Union High School District is to have effective and efficient communication with our students, their parents, community members, and stakeholders in the greater Buckeye and Goodyear communities.

I have heard many concerns voiced by parents who are not getting emails sent by the district or their schools over the last year and a half. While we know many of those issues are due to firewall blocks and security features on personal email accounts, we want to find a way to resolve this and increase communication. While texting seems to be the most widely used form of communication that allows our schools to send information directly to parents' phones, that too is not foolproof. As a school district, we desire to make sure that we are in constant communication with what is happening in BUHSD with our stakeholders, our parents, students, and staff members. To improve our communication with our stakeholders, we are in the process of having a Buckeye Union High School District App created that will help us to connect with every parent, student, community member, and staff member who chooses to download our app to their mobile device. Once completed, the app will be available on both Apple and Android and will allow us to communicate directly to all individuals who desire to receive our communications. Just like other apps that exist today, when we use our app to communicate with stakeholders, those stakeholders will have a notification on their phone and will be able to quickly read any message sent to them from wherever they are. Another benefit of having a district app is being able to quickly share communications and information beyond just messages to our stakeholders. Our app will have information contained on our website loaded to the app. Things like bell schedules, athletic calendars, social media posts, letters from the superintendent, and other communications will also be available on your mobile device very soon. We are hoping to be able to have our app ready to roll out in early October. We will let everyone know once it is available to be added to your mobile devices.

I am also excited to announce that I will be adding Instagram to my district social media platforms shortly allowing me to connect with even more followers regarding the great things happening in the Buckeye Union High School District. Soon you can follow us on Facebook, Twitter, and Instagram as well.

We look forward to improving our communication and connecting with you.

Sincerely,
Dr. Steve Bebee
